

JavaScript Learning Roadmap (2-Day Plan)

Day 1 Core JS + Logic Building

Core JavaScript Concepts:

- Type Coercion, == vs ===
- Variable Scope, Hoisting, Closures
- Callback, Promises, Async/Await
- Event Loop, Call Stack

Arrays & Objects:

- Object creation, cloning
- Array methods: map, filter, reduce
- Destructuring, Spread/Rest, Optional Chaining

Functions:

- Declaration vs Expression, Arrow Functions
- Higher Order Functions, Currying
- bind, call, apply, IIFE

JS DSA Arrays & Strings

- Reverse string/array
- Check palindrome
- Remove duplicates
- Anagram, Frequency count

Day 2 Advanced JS + Interview DSA

Asynchronous JavaScript:

- Promise chaining
- Retry logic, Custom Promise.all

ES6+ Concepts:

- Classes, Inheritance, Template Literals
- Default params, Modules, Sets, Maps

Error Handling:

- try...catch, Custom errors
- Rejected promises

JavaScript Learning Roadmap (2-Day Plan)

JavaScript Object Model:

- Prototypes, `__proto__`, prototype chain
- Getters/Setters, `Object.freeze/seal`

Functional Programming & Memory:

- Pure functions, Immutability
- Recursion, Function Composition
- Garbage Collection, Memory leaks

Logic Building & Practice:

- Sorting (Bubble/Selection)
- Search (Linear/Binary)
- Stack/Queue with array
- Two-pointer, Sliding window
