NEWTON SCHOOL'S PROFESSIONAL CERTIFICATION IN **DATA SCIENCE AND ARTIFICIAL INTELLIGENCE**

Upskill with
Newton School

About **Newton School**

Newton School is India's top platform that enables you to learn and develop the skills that you need for the best careers in tech. We boost your skills and prepare you for your dream job. We are dedicated to building and structuring your tech career for your dream companies worldwide based on your skills, eligibility, and preferences. Since inception, our students have been hired by companies like Epsilon, Zomato, Nykaa, and Affle as well as large MNCs like Publicis Sapient, Thoughtworks, Motorola, Nutanix, and many more.

Digital Goa Youth Summit

Newton School partnered with the Government of Goa to train 10,000 Goan students in industry-relevant tech skills, preparing them for the future.

Healthy Snacking Summit in Delhi

Two students participated in the Indian Healthy Snacking Summit organized by Farmley, where they learned from the best minds in the food-tech industry.

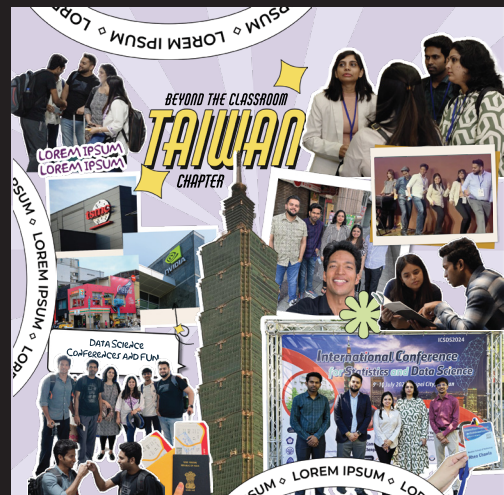

Startup Summit in Surat

Three students attended the Leading Startup Summit in Surat, connecting with industry leaders, exploring market trends, and discovering opportunities in the startup ecosystem.

International Conference in Taiwan

Four students represented Newton School at the International Conference for Statistics & Data Science (ICSDDS) in Taiwan, gaining global exposure and industry insights.

Why Data Science

Data science is the study of data to extract meaningful insights for business. It is a multidisciplinary approach that combines principles and practices from the fields of mathematics, statistics, artificial intelligence, and computer engineering to analyze large amounts of data.

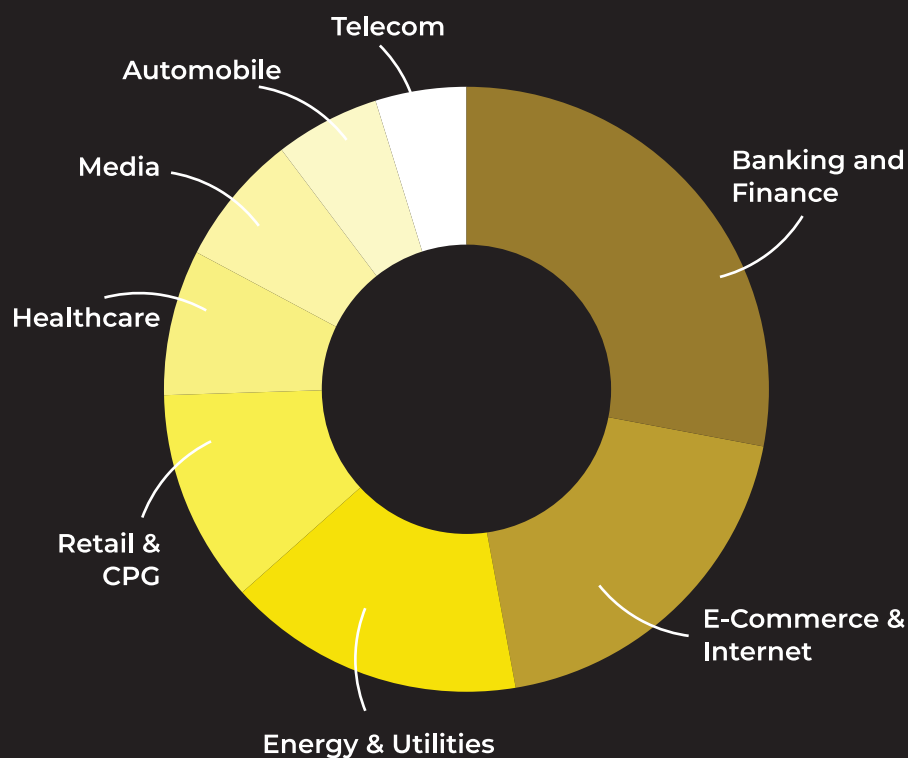

How Much Does a Data Scientist Earn?

Demand for Data Scientist jobs by 2026

According to 2022 technology forecasts, the field of data science is projected to witness a remarkable 30% growth in job opportunities by the year 2026, resulting in the creation of approximately 11.5 million new positions.

Data Science Job Openings in Different Sector Across India

Live Classes

Join real-time classes to fully harness the advantages of a virtual classroom. In addition to theory, learn live coding and problem solving from industry experts and get all your doubts resolved.

1-1 mentoring sessions

One-on-one mentorship sessions with assigned mentors working at the best tech companies in the world, like Google, Amazon, Microsoft, and more, to guide you throughout the course and your career.

Career Sessions

Creating resumes, training in soft skills, preparing for interviews, guest lectures, and more.

Real Projects from the industry

Work on real and messy data sets to solve 20+ problem statements and case studies from top companies and diverse industries and showcase them on your resume.

Mock Interviews

Mock interviews taken by industry experts after every module. Develop your soft skills to be able to pitch yourselves to recruiters and highlight your talent.

Success Manager

Receive a dedicated personal success manager who monitors your advancement, ensures you stay on course, and assists you with any inquiries. Essentially, they serve as your exclusive intermediary between you and Newton School

NewtonSchool Community

Leverage our alumni and student network for your initial job placement and beyond. Cultivate connections with peers who share your ambitions and journey to stay with you for life.

Teaching Assistant

Never worry about a concept, question or installation. Enjoy 1-1 real time doubt solving through teaching assistants.

Who Should

Enroll in this Program?

Are you interested in the program but unsure if it is the right fit for you? This program is designed to cater anyone who would like to make a career in the emerging data science industry.

We welcome
diversity and our
minimum eligibility
criteria reflects this.

- ☀ Graduates with a Bachelor's Degree from any field
- ☀ IT professionals
- ☀ Data professionals
- ☀ Business analysts

CURRICULUM

OUTLINE

Months	Phase	Become
4	Data Analysis and Tools	Data Analyst
4	Advance Analysis and Python	Business Analyst
4	Machine Learning and Operations	Data Scientist/ Machine Learning Engineer
2	Deep Learning	Deep Learning Engineer

Phase - 1

DATA ANALYSIS AND TOOLS

Spreadsheet

Digital canvas for organized brilliance.

- ▶ Basic of Data
- ▶ Introduction to Excel and Google Sheets
- ▶ Charts and Visualization
- ▶ Data Aggregation
- ▶ Pivot Charts
- ▶ Dashboarding
- ▶ Filters and Slicers
- ▶ Data Formatting
- ▶ Lookup functions
- ▶ What if Analysis

SQL

A wizardry language that turns data chaos into organized symphonies

- ▶ Introduction to Data & Databases
- ▶ Entities & Relations
- ▶ Types of Commands
- ▶ Filtering
- ▶ Wildcard operators
- ▶ Joins
- ▶ Subqueries
- ▶ Views
- ▶ Functions
- ▶ Windows Functions in SQL
- ▶ Window Frames
- ▶ Stored Procedures
- ▶ Group BY Aggregation

PowerBI

Data storytelling through interactive visuals.

- ▶ Introduction to Bussiness Intelligence
- ▶ Introduction to PowerBI
- ▶ Power Query Editor
- ▶ MQuery
- ▶ Data Modeling
- ▶ Filter context
- ▶ Data Transformation
- ▶ Calculations and measures
- ▶ Different Charts
- ▶ AI-based Visualization
- ▶ Dashboard
- ▶ DAX
- ▶ RLS

01
PHASE

Phase - 2

ADVANCE ANALYSIS AND PYTHON

Python

Where simplicity meets powerful programming magic.

- Introduction to Programming
- Strings
- Control statements
- Lists and Tuples
- List comprehension
- Sets and Dictionaries
- Python Functions
- Recursion
- Searching and Sorting
- Lambda Function
- File handling
- Exception handling
- OOps

Python EDA

The artful detective who reveals hidden stories of data.

- NumPy
- Pandas
- Matplotlib
- Seaborn
- Plotly
- Regex (Regular Expressions)
- Web Scraping using Selenium
- API

Probability and Statistics

Unlocking patterns, predicting outcomes

- Basics of Probability
- Discrete and Continuous Probability distributions
- Probability Distribution Functions
- Expected Value
- Sampling methodologies
- Central Limit Theorem
- Hypothesis Testing
- Z-test and t-test
- AB Testing
- Power Analysis

02
PHASE

Phase - 3

MACHINE LEARNING AND OPERATIONS

Machine Learning

Teaching machines to learn and evolve

Supervised ML

- Simple Linear Regression
- Multi Linear Regression
- Logistic Regression
- KNN (k Nearest Neighbors)
- Naive Bayes
- SVM and its Kernels
- Decision Trees
- Ensemble Methods

Unsupervised ML

- K-means
- Hierarchical clustering
- GMM
- DBSCAN
- Anomaly and Outlier Detection
- Dimensionality Reduction
- Recommendation System
- Time Series Forecasting (ARIMA models)

ML Ops

Deploy your models to the real world

- Github
- Self-serving apps using Streamlit
- Flask and FastAPI
- Docker and containerization
- Deployment of containers on the cloud

03
PHASE

Phase - 4

Deep Learning

Deep Learning

Work with text, images, and data.

- ▶ Neurons
- ▶ Neural Networks
- ▶ MLP
- ▶ Activation Functions
- ▶ TensorFlow and Keras
- ▶ Callbacks
- ▶ RNN
- ▶ LSTM
- ▶ NLP
- ▶ CV

04
PHASE

**Add Ons
(Async)**

- ▶ Basic Maths
- ▶ Excel VBA
- ▶ Tableau

SUPERCARGE YOUR CAREER WITH OUR SELECTIVELY HANDPICKED ELECTIVE SUBJECTS

After each phase of the program, you can select 1 elective course of your interest.

Phase 1: Data Analyst Phase

Story Telling using Tableau

Transform data into compelling stories with Tableau.

- ▶ Downloading and Installing Tableau
- ▶ Data Control and Data Preparation
- ▶ Visualizations & functions

Entrepreneurship

Unleash your entrepreneurial spirit and turn ideas into action.

- ▶ Ideal Startup Idea
- ▶ Finding your cofounder & Team
- ▶ Founder Equity and ESOPs

Phase 2: Business Analyst Phase

Product Sense

Hone your instincts for successful product strategies.

- ▶ Intro to Product Sense
- ▶ A/B Testing Analytics-Driven UX
- ▶ Strategic Product Launches

Big Data

Dive deeper into big data to unlock new scientific and business potentials.

- ▶ Big Data & Cloud Computing
- ▶ Hadoop & Spark
- ▶ Handling Dataframes in Spark

Phase 3: Data Scientist Phase

Generative AI & Prompt Eng.

Create and innovate with cutting-edge AI technologies.

- ▶ LLM's & GPT Evolution
- ▶ The Art of Prompt Engineering
- ▶ Real-World Application

Algorithmic Trading

Get ahead in the stock market using smart data science and trading algorithms!

- ▶ Algorithmic Trading in Stock Markets
- ▶ Candlestick Charts more
- ▶ Decoding Stock Time Series Data

Note: The second elective may also be unlocked upon request for top students based on performance.

Session Schedule

Day	Timings	Durations
Monday	9 pm - 11 pm	2 hrs
Wednesday	9 pm - 11 pm	2 hrs
Friday	9 pm - 11 pm	2 hrs

+Bonus session are added with prior communication*

*Session schedule is subject to change

Career Services

Get a headstart on placements

You get several opportunities (after each phase) in the program to secure placements, starting from the 4th month* and beyond

Receive personalised guidance

Your personal mentor will help you build your résumé, LinkedIn profile, and guide you through the entire process.

Interview with our hiring partners

You will receive interview opportunities from the best product companies in India with our network of 1500+ hiring partners including Epsilon, Google, Axis bank, SpiceJet and many more.

Become a pro at interviews

After each module, our industry experts will conduct mock interviews with you, providing both a realistic interview experience and tailored feedback to enhance your confidence.

Ace placements with company-specific preparation

Our company-wise prep teams will track your progress and prepare you for topics according to our hiring partners' requirements.

*placement opportunities at this stage will be based on eligibility and performance.

Lifetime career assistance

We offer lifetime career assistance, which means after completing this course, we would be here to offer you career assistance at any point in your life.

Softskill preparation

We place a strong emphasis on developing soft skills and business communication and other skills which would help you stand out during the interview process.

Interview Focus Weeks

Brush up your knowledge and take role-specific interview preparation sessions during our dedicated quarterly Interview focus weeks.

Interview Preparation Sessions

Practice real interview questions and optimise company specific preparation in our special weekend sessions.

Let's hear from our **Students**

"I have been working as a Research Analyst for 2 years but I knew that to truly excel in the tech industry, I needed to have a strong background in data science. I decided to take the plunge and enroll in Newton School's Data Science program. And I am so glad I did! The expert-led courses, real-world projects, and placement assistance have been invaluable in helping me gain the skills and knowledge I need to excel in the tech industry."

-Megha Sharma

"I have been working as an Instrumentation & Automation Engineer for a while now and while I enjoyed my job, I felt like I had hit a plateau in terms of growth and development. I wasn't sure if I could work and study at the same time, but my college friends motivated me to pursue a career in Data Science. They were alumni of Newton School and highly recommended the program to me. Newton School's program is flexible and well-structured, allowing me to continue working while I study."

-Shadab Akram

"The course did not settle with just the code based curriculum but had added benefits like soft skills training and mock interviews. These soft skills sessions helped me greatly and improved my communication skills which were surely reflected in the actual interviews. We were also given opportunities to compete in weekly competitions that checked our competence and helped in honing our skills. "

I am excited to share that I have taken a significant step in my career by becoming an Associate Consultant at [Albatroz Solutions](#). This opportunity fills me with immense happiness and gratitude as I embark on this new chapter in my professional journey.

To give a brief how I landed this opportunity. Well, I pursued [B.Pharmacy](#) from D.Y. Patil in Pune. Coming from a pharmaceutical background, I didn't find enough growth opportunities for a fresher in B.Pharma and moreover by the 3rd year, I started losing interest given the restrictive career growth in field and started researching for something unique with more growth opportunities. During that time, my friends and seniors from pharmacy advised me to look for some other fields and not to restrict my self.

Hence, I started researching about in demand fields in the market currently, where I learnt about Data Science. Upon researching the same, I found it fascinating and since I always had love for statistics, I started looking to learn more about the field, where I came to know about [Newton School's](#) Data Science Certification Program in January 2023. While joining the course, I was not sure if I'd be able to manage as I wasn't so hands on with python. But without giving no second thoughts, I joined the course.

The initial first week was an overview as to how the course would look like for 6 months. Every day there was something new to be learnt and also assignments to be solved for that specific topic on the same day. The way the problems for each topic have been segregated into assignment and homework was beneficial. They helped me not just in learning how to implement the problems that were discussed in the class but also gave new problems on each topic that tests our understanding towards the topic.

My mentors helped with all the doubt solving and providing consistent motivation to solve assignments.

Moreover, I was provided with various mock interviews to get me ready for the next step. Also, I devoted my time on self study too to leave no stone unturned. Soon, Based on the performance, I received a call from the recruiting team of Albatroz. Upon performing well in all the interview rounds, I was finally offered the role.

I would like to take this opportunity to thank the entire team of [Newton School](#) for helping me get me this opportunity. I would recommend Newton School to anyone who is looking to make a switch to Data Science upskill themselves even if you're from Non Tech because nothing is impossible.

I'm thrilled to share that I've finished my Professional Certificate Course in Data Science at [Newton School](#)! This program went beyond just grasping Data Science theories. It was hands-on, with real examples and cool projects. Excited to use everything I've learned in the real world. Here's to new beginnings and solving problems with data! 🚀 [#DataScience](#)
[#NewtonSchool](#) [#CareerJourney](#) [#dataanalytics](#) 🙌

🚀 Exciting Career Update 🚀

I am thrilled to share a significant milestone in my professional journey! Last month, I successfully landed a position as a Data Support Analyst at [Jumbotail](#), and I couldn't be more excited to embark on this new adventure.

🌟 A Gratitude Note 🌟

This journey wouldn't have been possible without the unwavering support and guidance of some incredible individuals. I want to take a moment to express my sincere gratitude:

🙏 [Prakhar Saini](#) -You have been an invaluable source of wisdom, offering guidance and inspiration throughout my career transition. Your mentorship has been instrumental in equipping me with essential skills for my role

🙏 [Akashdeep Makkar](#) - Your expertise and dedication have made the process of learning Excel, SQL, and Python libraries both fascinating and rewarding. Your insights have played a pivotal role in shaping my path.

🙏 [Rajat Jain](#) -Your passion for Python is contagious. His teaching style has transformed complex coding concepts into accessible knowledge. I am immensely grateful for your support.

I'm eager to apply the knowledge and skills I've gained during my Data Science course at [Newton School](#). This journey has been a testament to the power of learning, perseverance, and the incredible people I've had the privilege to learn from.

Special thanks to all my batchmates at Newton School who have been an integral part of my learning journey. Your camaraderie and collaborative spirit have significantly contributed to my growth. I appreciate the valuable discussions, and mutual support that we've shared.

I look forward to contributing to my new role and continuing to learn and grow in the world of data.

I am excited to share that I have taken a significant step in my career by becoming an Associate Consultant at Albatroz Solutions, a reputable and esteemed organisation. This opportunity fills me with immense happiness and gratitude as I embark on this new chapter in my professional journey.

I would like to extend my sincere gratitude and heartfelt thanks to my instructors, mentors, and [Newton School](#) for their unwavering support and guidance throughout my certification journey. Their invaluable mentorship has been instrumental in shaping my capabilities and has played a vital role in my success in securing this remarkable offer.

I am truly thankful for their belief in my potential and for their continuous encouragement. As I step into this exciting phase of my career, I am inspired by the opportunities ahead and am determined to make the most of them. I am grateful for the foundation that [Newton School](#) has provided.

Hello LinkedIn Community,
It's been some time and I'm already mastering Excel, Python, SQL, Advanced Mathematics, Tableau. 📊🔍

It's been sometime now, While searching endlessly about data science certification programs on Google, I came across Newton School. Everything changed from there. I started my data science journey with mathematics and excel, two things I was most scared off. But to my surprise and my mentor's amazing guidance, I'm already acing both.

I am eagerly looking forward to diving into the upcoming modules, which will cover specialised topics such as machine learning, big data analytics, and data visualisation.

It's been a roller coaster ride and I can say for sure that being consistent is the only key to success in data science industry. 🚀🔥
